A large, abstract white shape graphic is positioned in the center-right area of the page. It consists of several overlapping, rounded, organic shapes in white and light gray, creating a sense of depth and fluidity.

BUS SMART SYSTEM

BUS SMART SYSTEM

A grayscale map of a university campus with buildings outlined in yellow. Four yellow bus icons are marked with blue circles and letters: 'A' at the top left, 'C' in the center, 'B' at the bottom right, and 'G' at the top right. A small blue dot labeled 'You're here' indicates the user's current location. A gray button at the bottom center says 'Displayed All Buses'. A large dark blue button at the bottom says 'Ride a bus'. A white button at the bottom right says 'Route Planner'.

BUS SMART SYSTEM

A map of a university campus showing several buildings outlined in yellow. Four buses are marked with blue circles and letters: 'A' is at the top left, 'B' is at the bottom right, 'C' is in the center, and 'G' is at the top right. A small blue dot with a tail indicates the user's current location. A grey button at the bottom says "Displayed All Buses". A large dark blue button at the bottom says "Select bus".

Select Bus Screen

Select Bus Screen is where user select the bus that they want to ride. For example, the image shows that Bus A is selected as bus user want to ride. While the map shows all the busses nearest user area and the type. User can click the “i” Icon and it will navigate to Road Information Page. Once they've made up their minds, user will click the select button and it will bring to the Station Confirmation Page. If the user want to go back to the last screen, user can click back button (left arrow icon) on the top left.

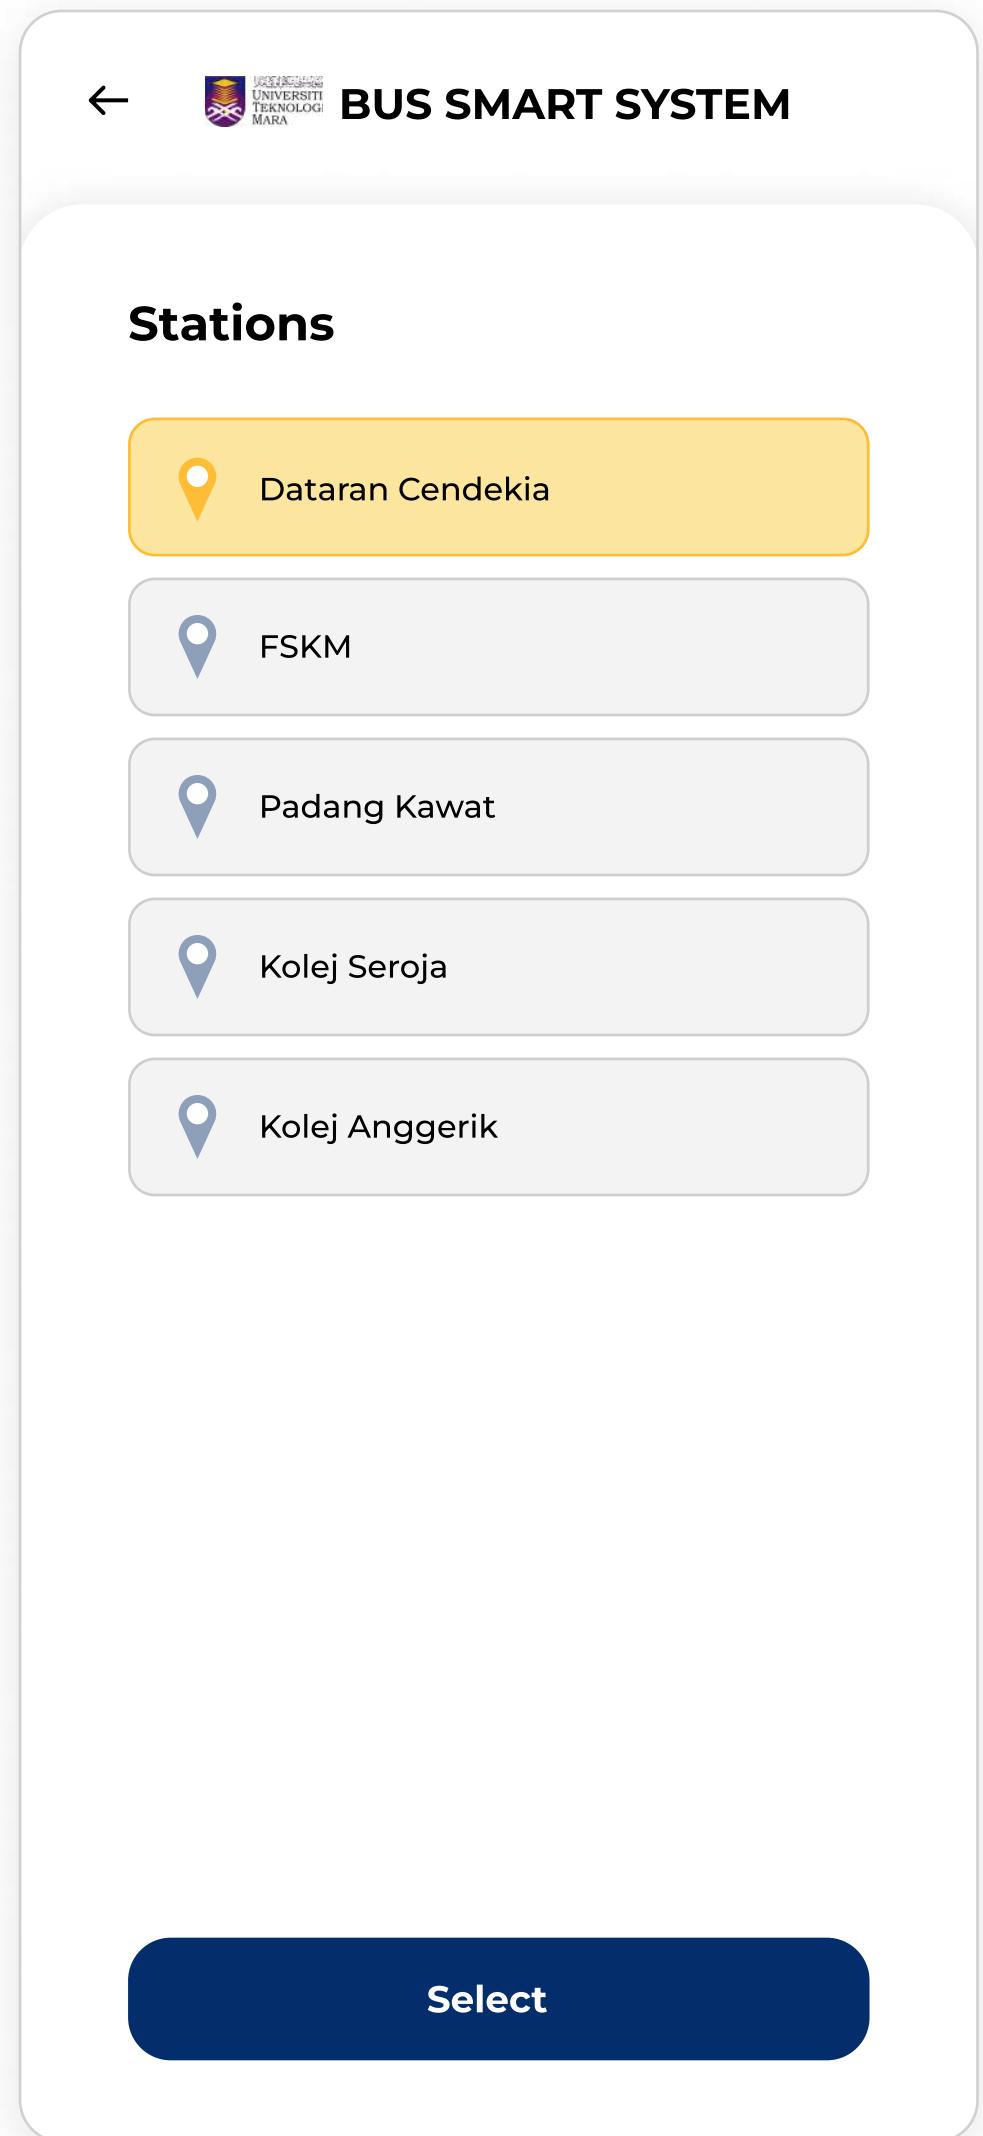

Road Information Screen

Road information page is where it shows which bus go to which station. Once the user have understand they can go back to the last screen by click back button (left arrow icon) on the top left.

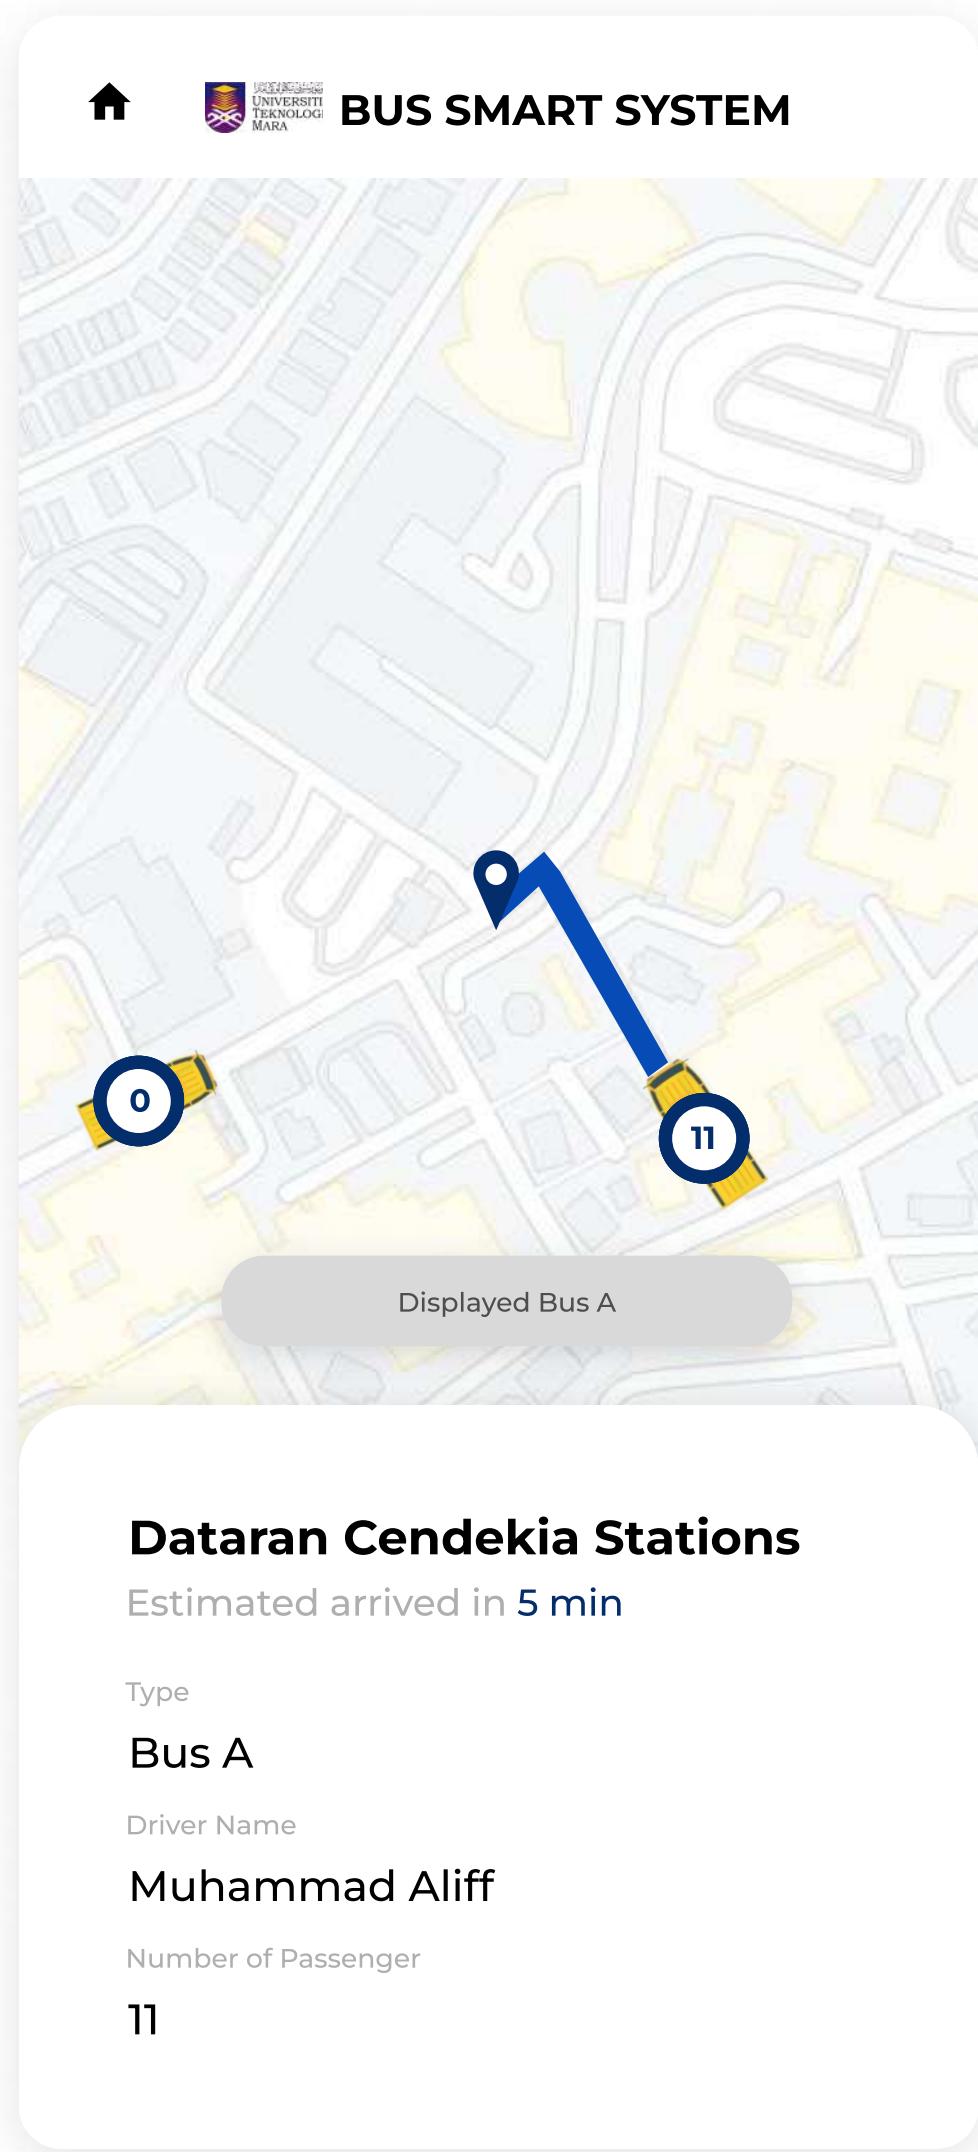

Station Confirmation Screen

Station Confirmation Screen is after the user has selected the busses and confirm which station they want to go for ride the bus. The map shows all Bus A nearest the user as stated in the grey container which says “Displayed Bus A”. The circle on the bus on the map is indicator for how many passengers in the bus and the color (red) is indicator if it compact or reach maximum passenger otherwise it shows “blue” indicator. The small blue circle with outer transparent blue circle is where user is. The line dashes is line between the user and station. The pinpoint is where the station is. If the nearest station or selected station is according station user chose, then click Confirm and it will bring to the Waiting for Bus Page. While the “Choose another station” button is for when the user want another station, if the user click it, it will bring the user to List Station Page. The back button is when the user want to go back to Select Bus Page.

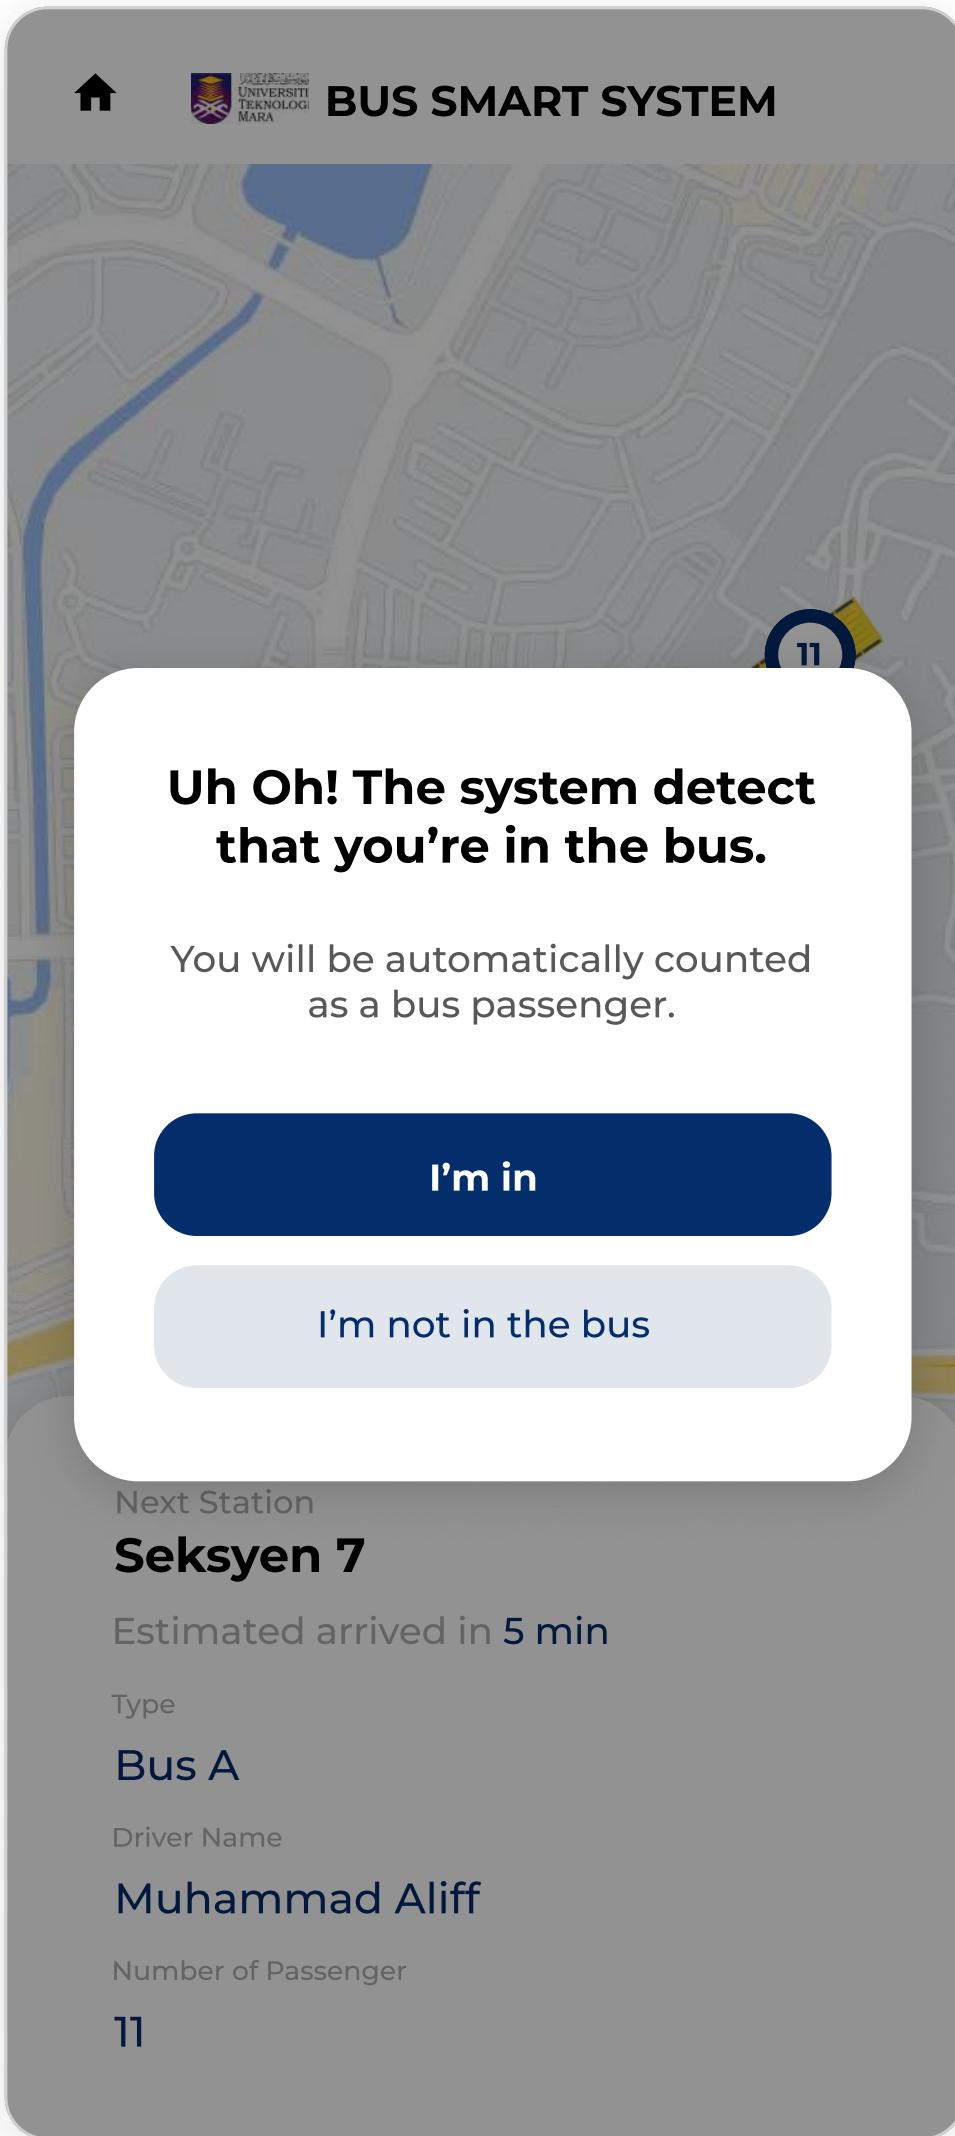

List Station Screen

List Station Screen is when a user want to choose another stations. There are 5 clickable option and one station can be selected. The selected stations will be highlighted with orange -ish color. Once confirmed, user can click the “Select” button and it will go back to Station Confirmation Page for confirmation. The back button on the top left is for when the user wants to confirm the last station they selected.

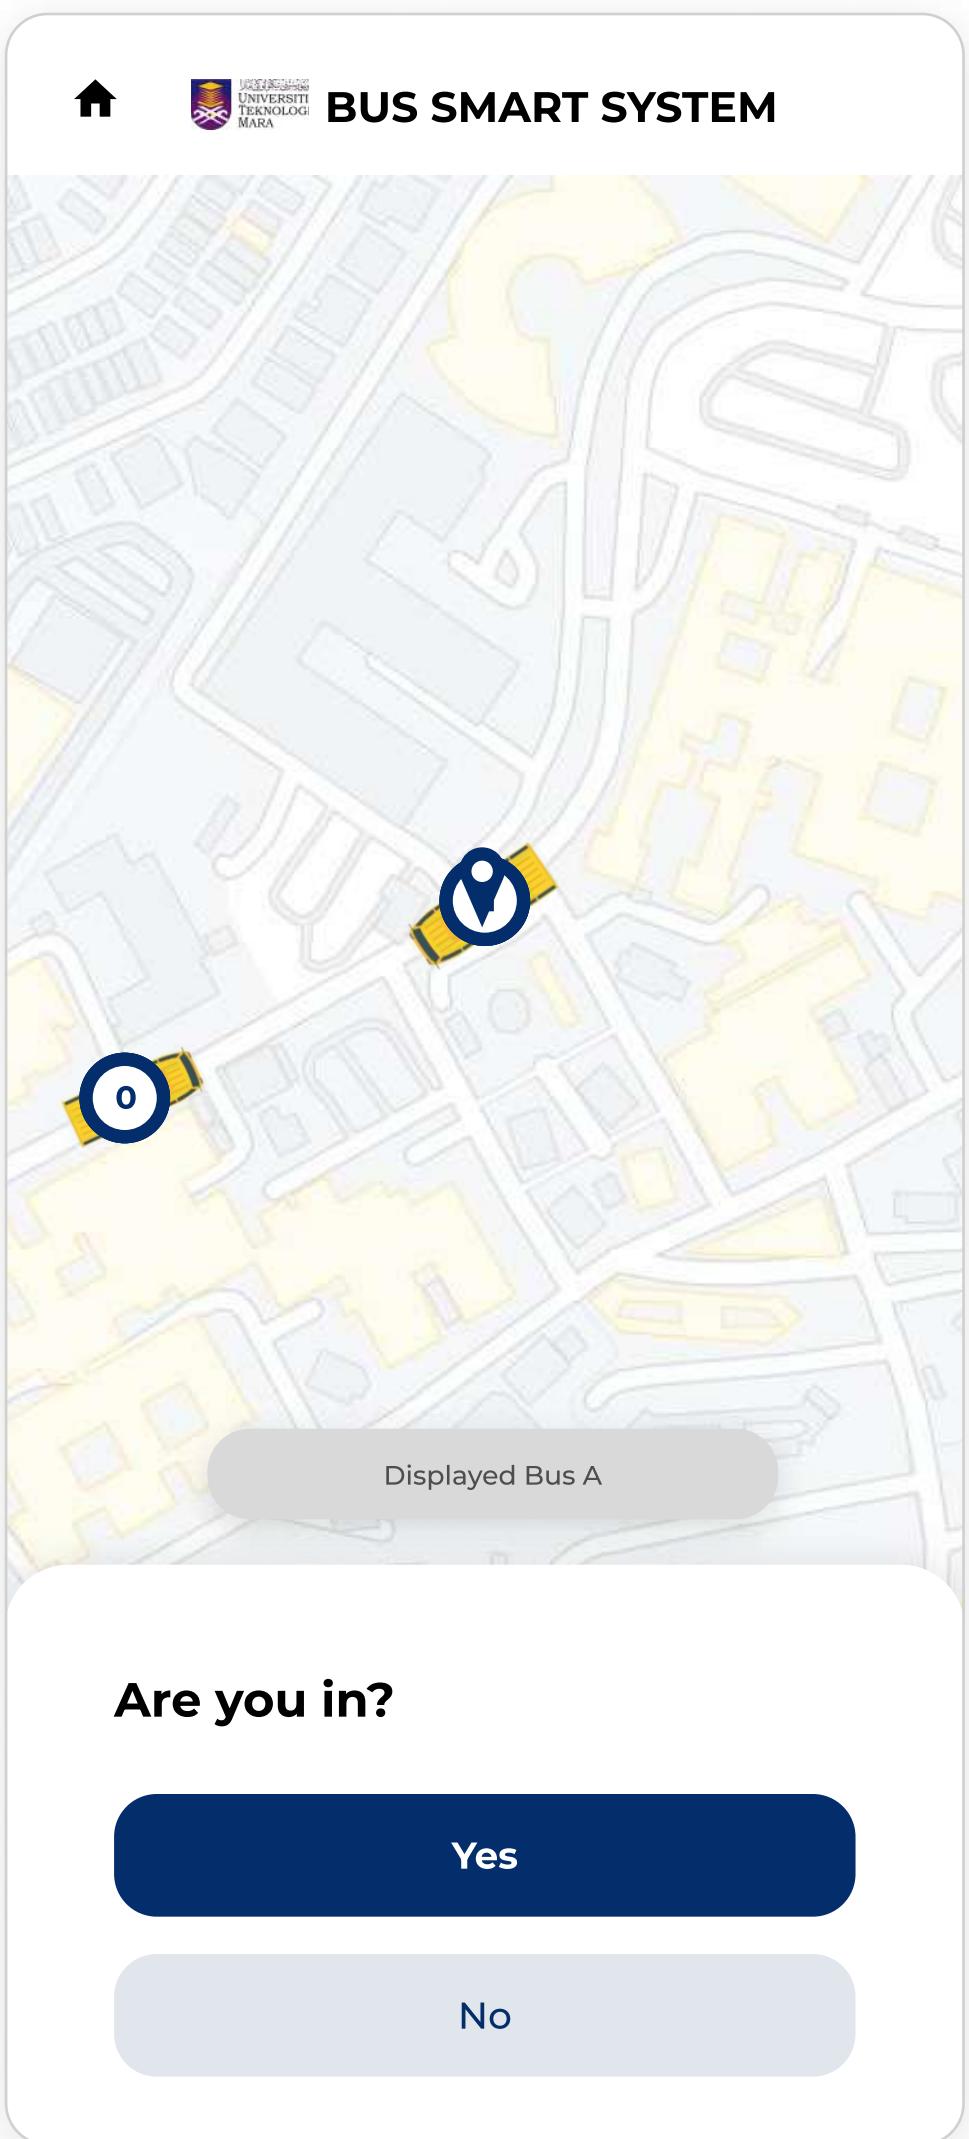

Waiting for Bus Screen

Waiting for Bus Screen is screen where it shows the next bus information, estimated waiting time, driver information, where the bus is, the path taken by the bus and number of passengers. The white box at the bottom shows the next bus information, estimated waiting time, driver information and number of passengers. The blue line path indicates the path of the next bus.

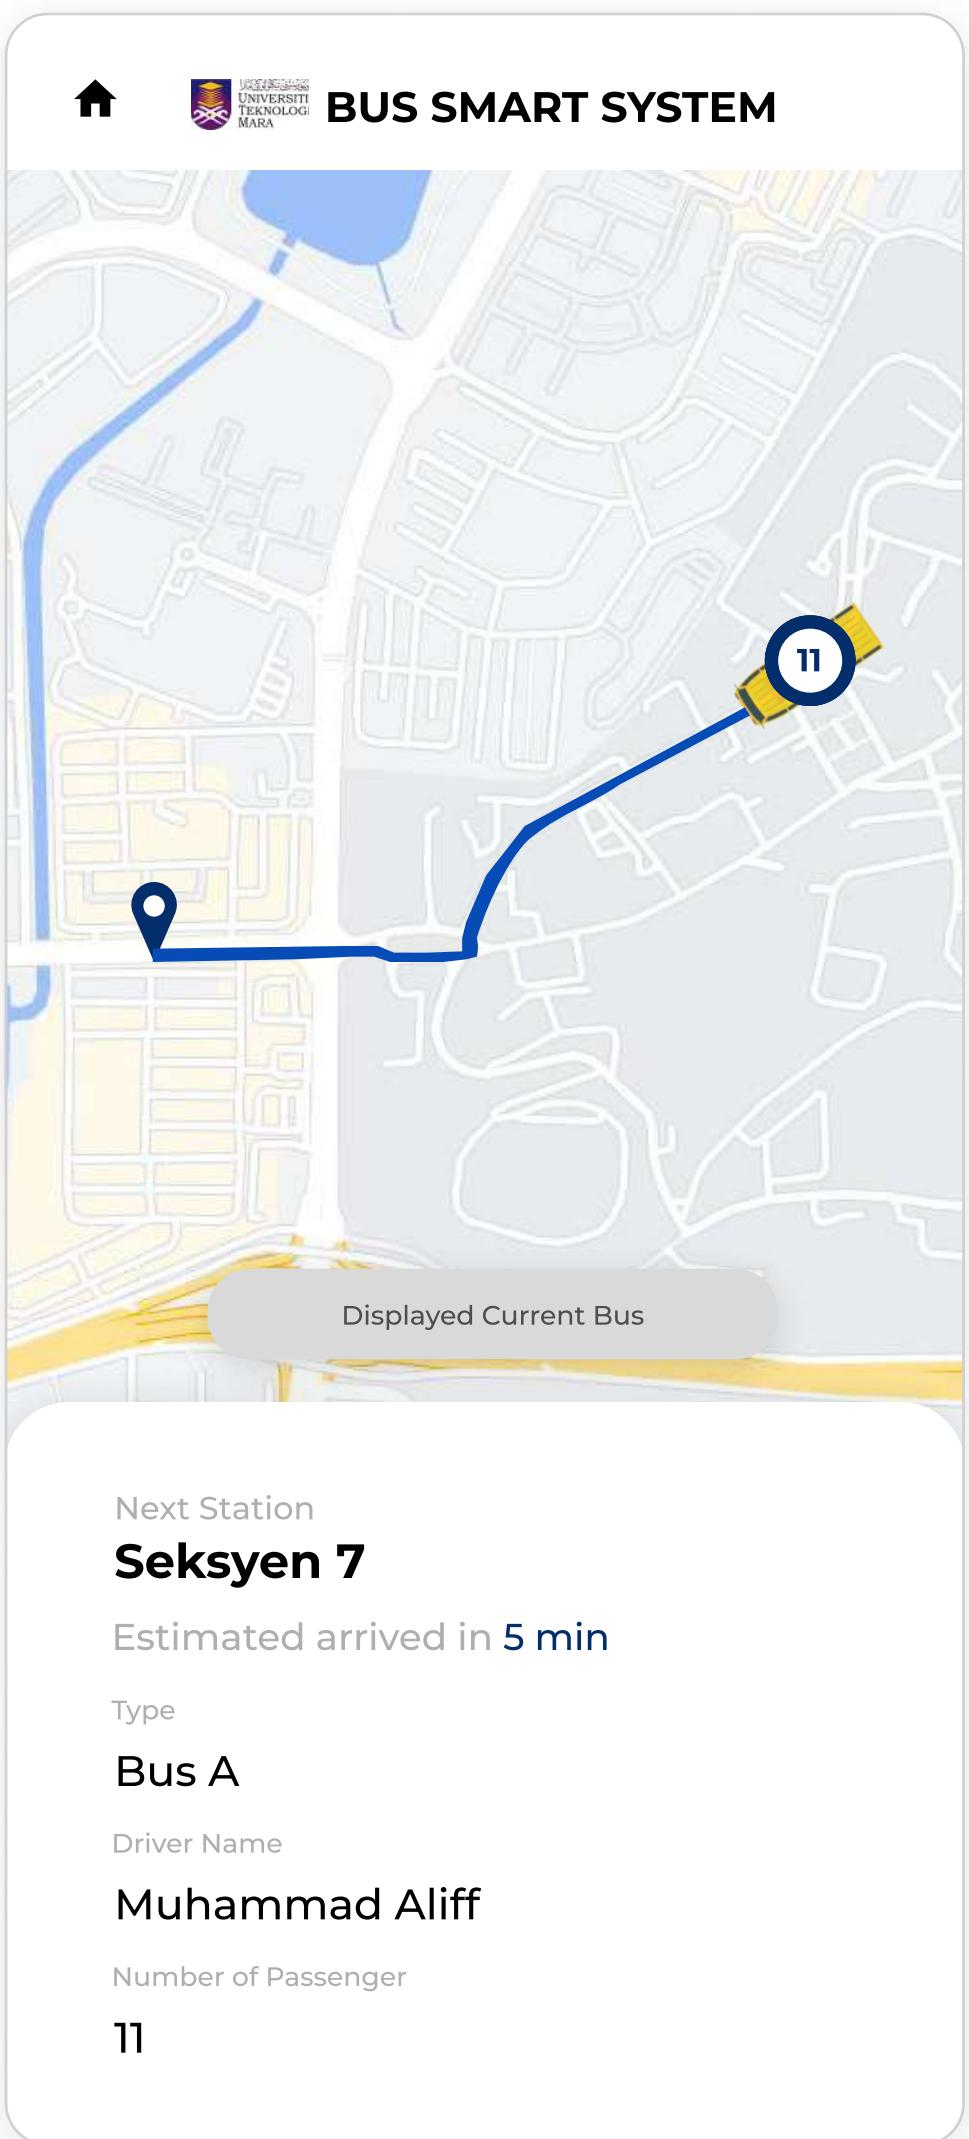

Uh-Oh! alert Screen

Uh-Oh! alert Screen will trigger after Bus Arrived (After Waiting for Bus) Page and if the user location is too near with bus location (as if the user is on the bus) after a few minutes and a few hundreds of meters from the station that user picks to ride on the bus. It shows that they will be counted as bus passenger. So there are buttons for user to reconfirm that they are on the bus or not. If yes, they will press the "I'm in" button and it will navigate the user to On-Bus Screen. Otherwise, the user will press the "I'm not in the bus" button and it will go back to the Waiting for Bus Page.

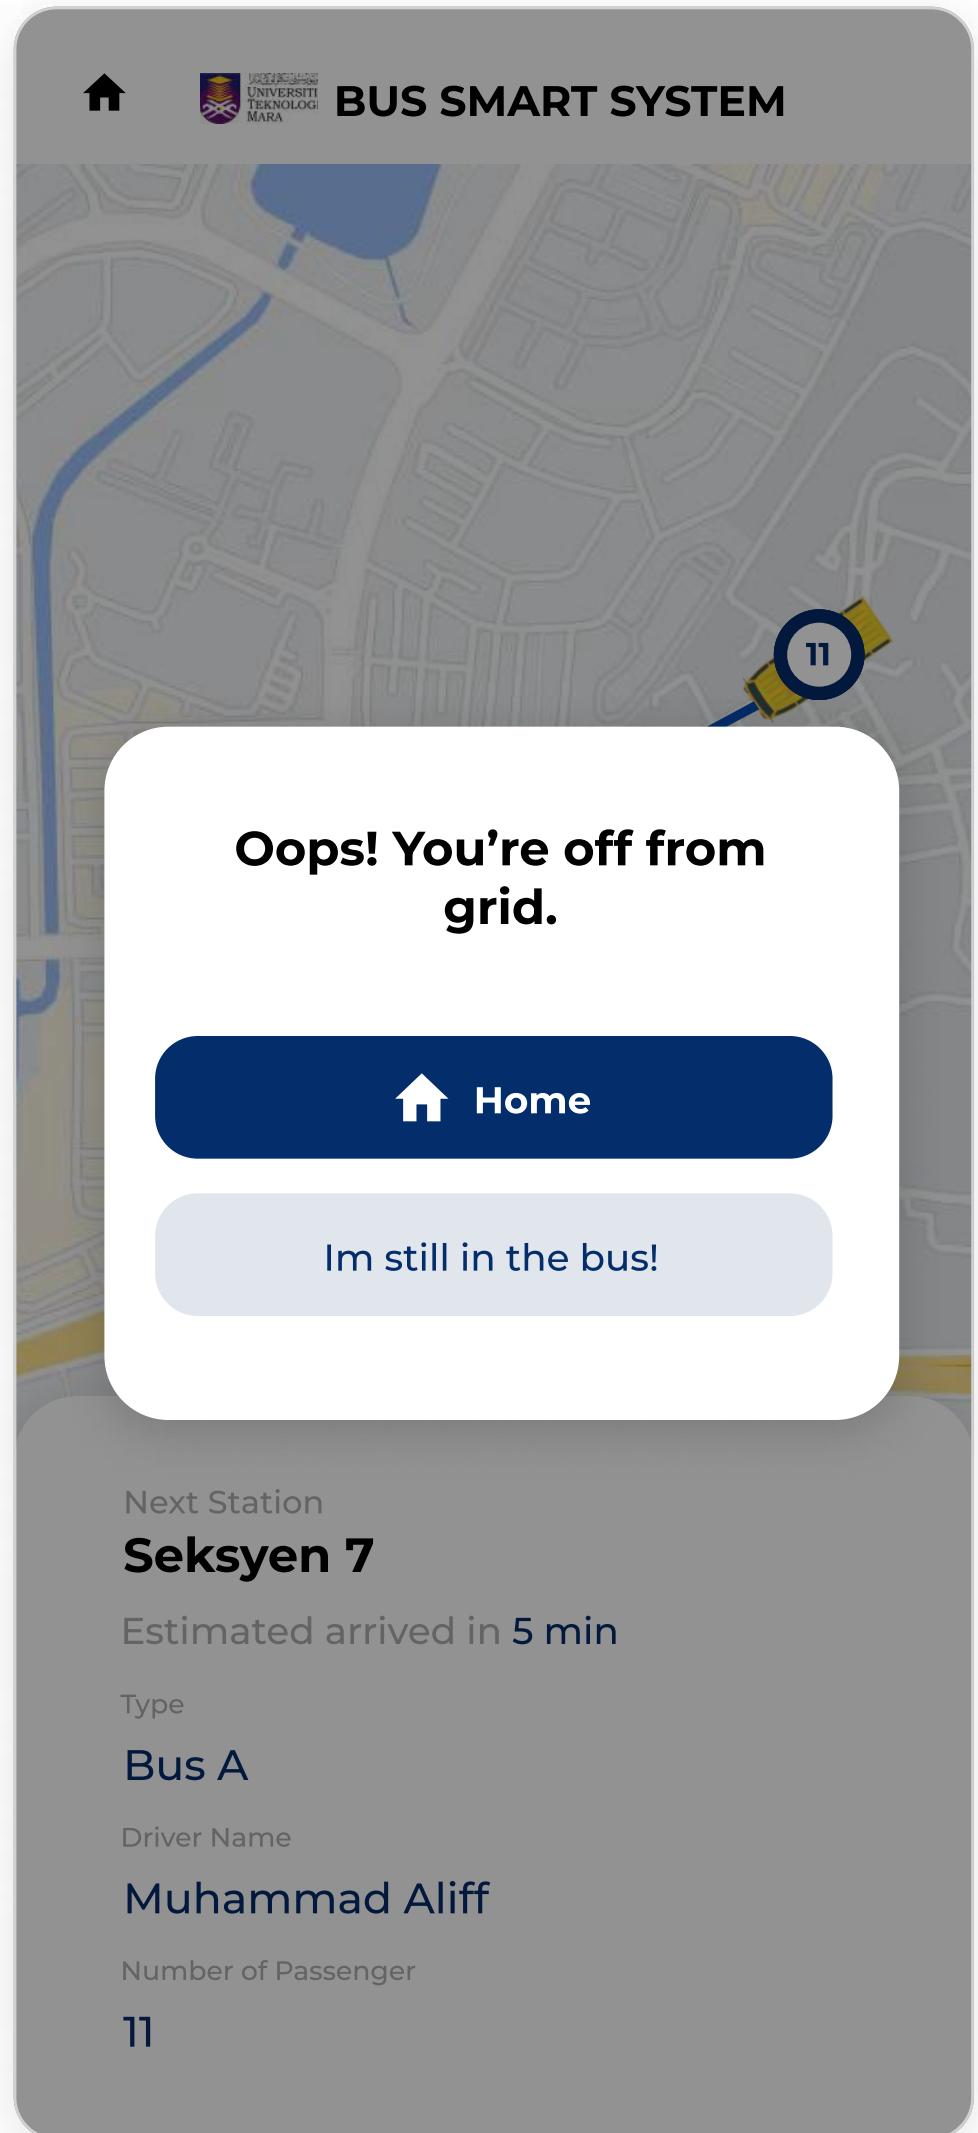

Bus Arrived (After Waiting for Bus) Screen

Bus Arrived Screen is when the bus is at station where the user waits (trigger after Waiting for Bus Page). The screen prompt a confirmation that user already in bus or not. If yes, the user will pressed the “Yes” button and it will navigate to On-Bus Screen. Otherwise, the user will pressed “No” button, it will go back to Waiting for Bus Page to wait another bus.

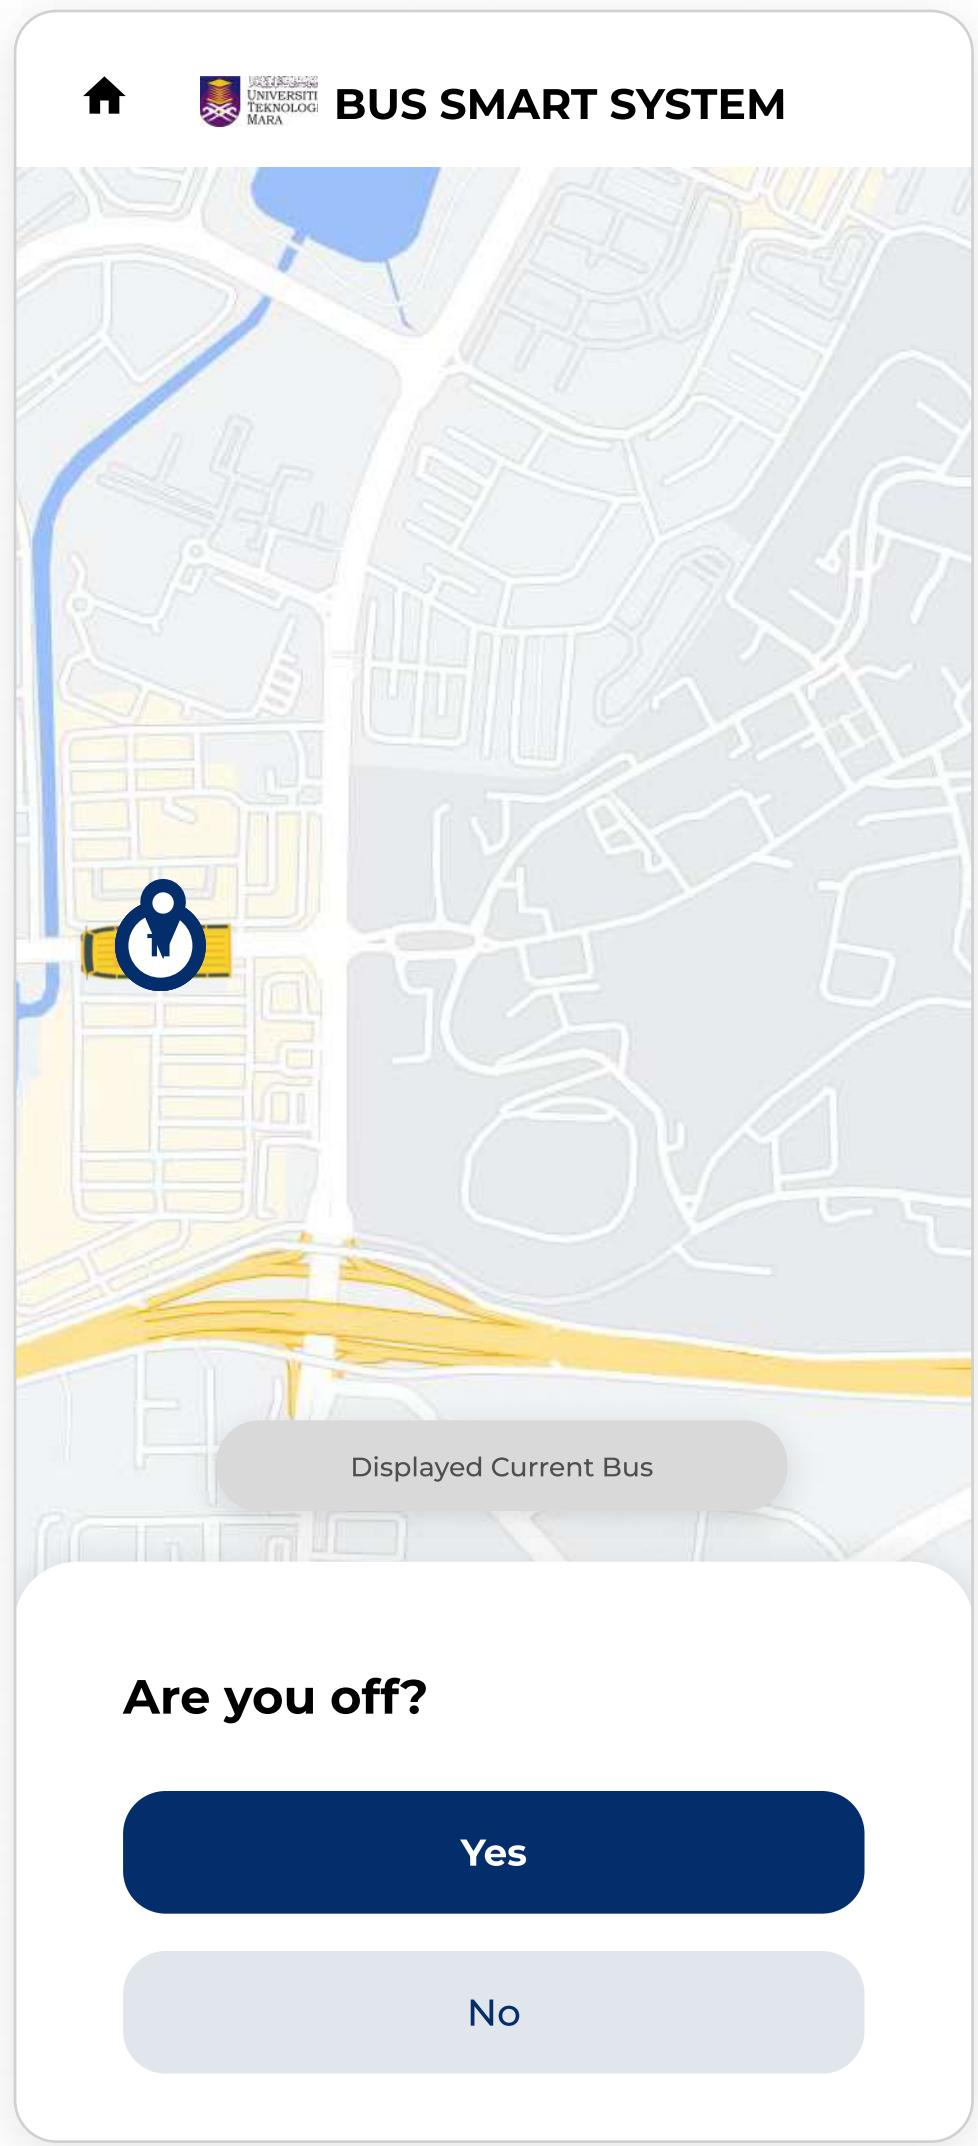

On-Bus Screen

On-Bus Screen is screen where it shows the next stop for current bus, the path taken by the bus to the next station, bus information, driver information and number of passenger. The blue line path is the path taken by the bus to the next station. The pinpoint location is the next bus stop. In the map only shows the current as stated in grey container. The white box at the bottom shows the next stop for current bus, bus information, driver information and number of passenger.

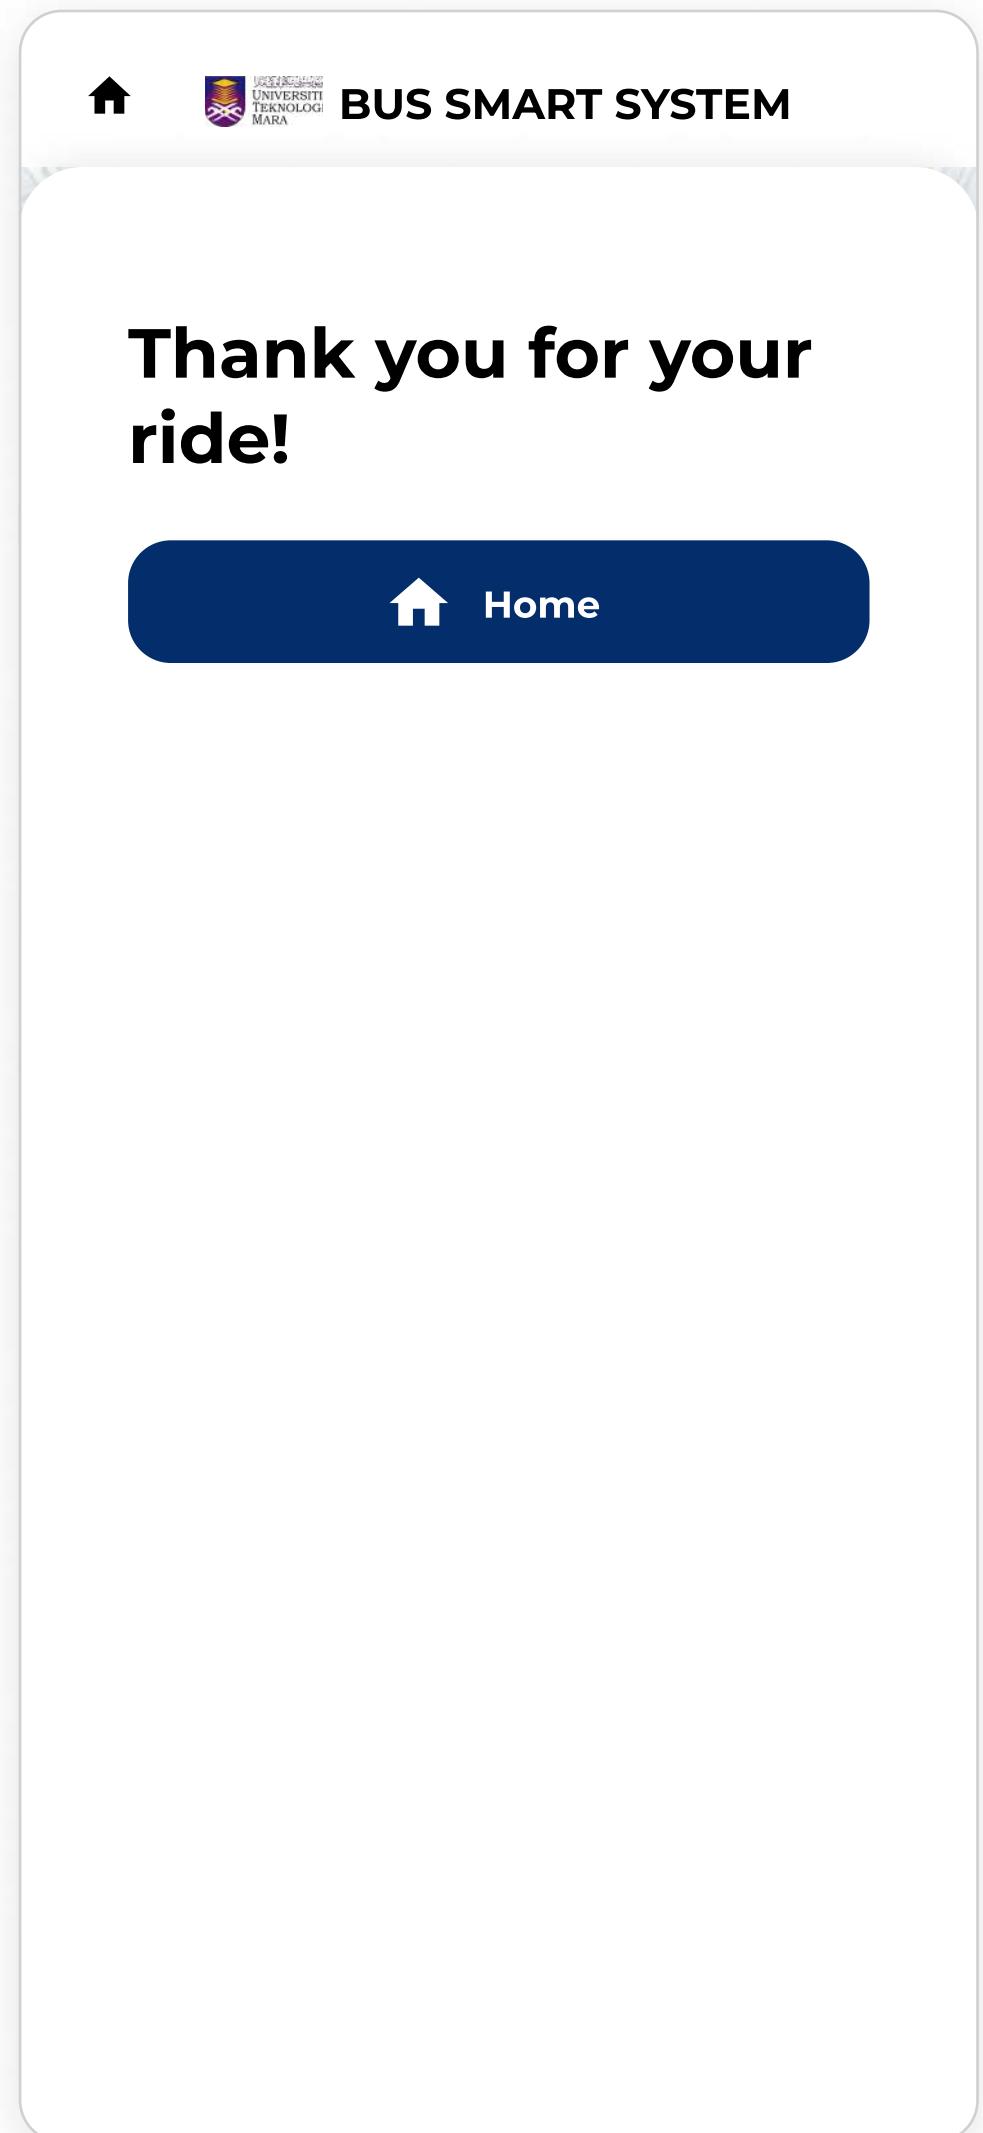

Oops! alert Screen

Uh-Oh! alert Screen will trigger after Bus Arrived (After On-Bus) Page and if the user location is too far with bus location (as if the user is on the bus) after a few minutes and a few hundreds of meters from last bus stop. The screen will shows that they are off the grid means they are too far from the bus It shows that they will be counted as not in the bus. So they are button for user to reconfirm that they are on the bus or not. If yes, they will pressed the “I’m in in still in the bus!” button and it will navigate the user to On-Bus Screen. Otherwise, the user will pressed “Home” button and it will go back to the Home Page.

Bus Arrived (After On-Bus) Screen

Bus Arrived Screen is when the bus arrived at the next stop (trigger after On-Bus Page). The screen prompt a confirmation that if user want to stop at current station or already get off the bus or not. If yes, the user will pressed the “Yes” button and it will navigate to Thanks for Your Ride Screen. Otherwise, the user will pressed “No” button, it will go back to On-Bus Page to go to the next stop.

Thanks for your Ride Screen

Thanks for your Ride Screen is screen that will trigger after Bus Arrived (After On-Bus) Screen and the user have arrived at the station they want to go. The screen will show “Thank you for your ride!” and a “Home” button to go back to Home Screen.
